DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 24-25, 28-29, 31-33, 35-36, 38-41 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 28, and 35-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Fukuda et al. (5,491,514).

Regarding claims 28, and 35, Fukuda discloses coding, decoding apparatus for video signal comprising:

means for determining the variation of the direct current (DC) level of a received signal (see fig.17, element 1701 and its description);

means for controlling the operating mode of said adaptive equalizer as a function of the determined DC variation, wherein said received signal includes a field sync signal and wherein said DC variation determining means operates on said field sync signal (see fig.17, element 1702 and its description).

Regarding claims 29, 36, the means for sampling is inherent in digital coding signal, and also stated by applicants in Remark filed on Oct. 10, 2006.
